

Mobile App. Development (Bis)

Onderstaande installatie was succesvol op de emulator Nexus 4 – 4.3. Op Nexus 5 gaf onderstaande installatie problemen. Voor Nexus 6 – 5.0 volgt u een andere link.

Wellicht merkte je reeds op dat de Google Apps (o.a. de Playstore) niet op Genymotion Emulator aanwezig is. Onderstaande werkwijze beschrijft een work-around. Tijdens het installeren kunnen verschillende foutmeldingen te voorschijn komen. Deze mag men negeren om zo de installatie te voltooien. Dezelfde procedure is ook beschreven op volgende link:

<http://blog.zeezonline.com/2013/11/install-google-play-on-genymotion-2-0/>

1 Download

Voor Android Lollipop (5.0)

<https://www.androidfilehost.com/?fid=95784891001614559>

Andere Android-platformen: download de laatste versie van de 'Google Apps' zip-file op

http://wiki.rootzwiki.com/Google_Apps#Universal_Packages_2

modified to selectively extract certain parts of the pack. Currently, it will only extract files relating to Face Unlock on devices that have a front-facing camera, and will look to see if it needs to extract NEON-compatible library files or non-NEON files.

Compatibility

Google Apps packages are not cross-compatible with other major Android versions. For example, the 20120224 pack for Ice Cream Sandwich (Android 4.0) is not compatible with Gingerbread (Android 2.3). Likewise, the DRC83 package for Donut (Android 1.6) will not work with Honeycomb (Android 3.x). Flashing an incompatible package may cause a variety of bugs, boot-loops, crashes, force-closes, kernel panics, plagues, rashes, coughing, sneezing, headaches, diarrhea, vomiting blood, blood dripping from scrotum, thermonuclear war, unending Tic-Tac-Toe games, Mayan Doomsday, flooding, purple pustules forming on the face, a bricked device, exploding batteries, or nothing at all. Regardless, it is not recommended, and support will not be provided by any competent developer to a user who has done so.

Downloads

Please note: The CyanogenMod Team, TeamDouchie, Steve Kondik (Cyanogen) and related parties are not involved with the creation of the Google Apps packages. The packages are found on the Internet, tested by a variety of community members, and if they pass testing and fill a need, they are marked as recommended by the Android community, and provided for download via trusted mirrors such as Goo.im. The Google Apps are the intellectual property of Google Inc., and are provided to restore the applications which come on devices which are licensed to have Google's proprietary code.

Jelly Bean (Android 4.1.x-4.3.x)

Universal Packages

20130813 [↗](#)
MD5: 1f51b5cc6370c1f45dc951109b6ce6ed

- **Not compatible with 4.2.x!**
- All APKs updated to 4.3.0 versions, where applicable.
- Does not include GalleryGoogle, meaning no Photosphere-equipped Camera app.
- Gmail added to package (for those who could not download through Play Store) and updated to 4.5.2-714156.
- Google+ added to package (to fix Location map tiles bug) and updated to 4.1.0.50809204.
- Google Play Services updated to 3.2.25.
- Google Play Store updated to 4.3.11.
- Google Search updated to 2.6.7.721924.
- TalkBack updated to 3.4.0.

20130812 [↗](#)
MD5: 5f22f046e37038a3856eeb825e73d4ed

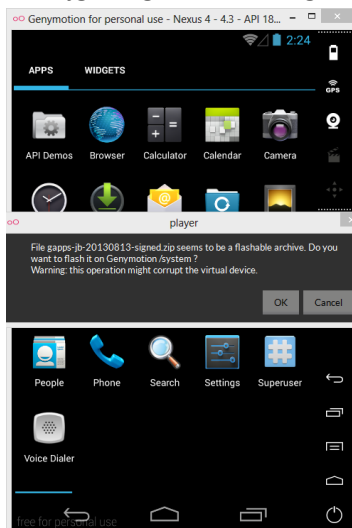

- **Not compatible with 4.3.x!**
- Not recommended for 4.2.1.
- Does not include GalleryGoogle, meaning no Photosphere-equipped Camera app.

2 Installatie

Start jouw device op, en sleep de zip-file op de emulator.

Je krijgt volgende melding, waarbij je op 'OK' klikt.

Je krijgt een aantal errors te zien, die je mag negeren. Na installatie wordt er een reboot van het device gevraagd.

Je krijgt volgende foutmelding dat je mag negeren.

Afsluiten kan door rechts onderaan lang genoeg op de power-toets te drukken.

3 Heropstart device

Bij het opstarten kunnen foutmeldingen voorkomen.

Controle bij de geïnstalleerde Apps leert dat er Google Apps bij gekomen zijn.

Start de Play Store op. Gebruik een bestaande of maak nieuwe google account .

Doorloop de verschillende stappen. Negeer de getoonde foutmeldingen en klik telkens op ok!

Open de Play Store, en installeer Google Maps...
